

Worthington | TUFFBOOM Screens

TUFFBOOM Series booms excel in capturing floating debris and trash at the surface. In higher flow conditions, or where debris is partially submerged, the addition of subsurface debris screens will greatly enhance the performance of the booms.

Debris screens feature a structural steel frame with a mesh or solid panel overlay. Frames can be provided in galvanized or stainless steel. Debris screens are designed to easily attach to the patented TUFFBOOM bottom plates as original equipment or to existing boom lines where additional depth is desired. Used in conjunction with the deflector panels and you have a system that rejects big and small debris.

	TUFFBOOM	TUFFBOOM-XL
Length	330 cm. (130 in)	483 cm (190 in)
Depth	30 cm, 60 cm, 90 cm (12 in, 24 in, 36 in)	30 cm, 60 cm, 90 cm, 122 cm (12 in, 24 in, 36 in, 48 in)
Panel Material	19 mm (3/4 in) metal mesh Solid PVC or Rubber	19 mm (3/4 in) metal mesh Solid PVC or Rubber
Custom designs also available.
